ABOUT THOMAS

Since 1972 Prof. Dr. Thomas Christaller is dedicated to the Japanese martial art Aikido. On his first visit to Japan in 1986 he experienced Nobuyuki Watanabe Sensei, 8th dan Aikikai, at the Hombu Dojo. Meanwhile this has deeply impressed him and since 1995 he regularly takes part in the seminars of KenBuKan or KenBuKai where Watanabe Sensei is teaching. In his former life as professor in Artificial Intelligence Thomas worked on mobile robots, collaborated with many scientists world-wide. His insights into body movements, neural control, and perception makes up a unique exploration into Aikido as on-going research. In 2009 he co-founded the Center for Moving & Ways of Life in Bonn where he is teaching regularly.
